## MASTER CONSTRUCTION PROJECT MANAGER

# PROGRAM OVERVIEW

This Chartered Certification Master Construction Project Manager (MCPM) Program is designed to facilitate a framework for providing management counsel to clients, institutions in the public and private sector. Candidates will incorporate the informational fabric from the core curriculum and become open to examples of comprehension in their technical expertise and experience in global human resources consulting roles to organizations.

# PARTICIPANTS

This Program is designed for:

- Construction Managers, Executives and Professionals
- Engineers
- Project Managers
- Contractors and Real Estate Executives
- Professional Consultants
- Architects
- Safety Professionals
- Facility Managers
- Sustainable Developers

# PROGRAM OBJECTIVES

The Certification affords individuals the opportunity to obtain substantive industry documentation attesting to their knowledge, and skills. It recognizes individual abilities and provides the certification necessary, that allows seasoned Construction Manager(s) recognition in the following core industry areas:

- Field project management, running the project from the field, ensuring accountability of corporate assets.
- Time management, coordinating resources sufficient for the tasks at hand.

# TRAINING APPROACH

This 4-day Program is delivered using “blended learning.” It involves lecturing, highly intensive case study/role playing reviews, team interaction and feedback, and one-on-one coaching from the facilitator.

# PROGRAM OUTLINE

## Day One

- **Introduction**
- **Construction Project Participants:** the main participants in a construction project and the roles they play
- **Organizational Structures:** roles of design and construction firms, with reference to their similarities and differences in organizational structure
- **Project Chronology:** review and explore the phases and stages and the actions involved with the delivery of a construction project

## Day Two

- **Project Chronology**
- **Construction and Closeout:** examine the work that is carried out on the site and the importance of each aspect before bringing the project to a formal closure
- **Sustainability Modelling with the BSSM:** focus on the ability to deliver a project with an eye on sustainable development and a look towards the future

## Day Three

- **Project Planning:**
- **Construction Scheduling:** planning for success and then how to schedule the work efficiently
- **Project Controls:** monitoring and controlling of that work to assure a greater chance of timely delivery
- **Construction Costs**

## Day Four

- **Construction Quality**
- **Job Site Administration:** the communication, information management and reporting requirements of the project
- **Construction Safety:** the health, safety and environmental aspects of delivering a construction project
- **Client Relations**

## CERTIFICATION EXAM

Mark Reeson is a valuable asset within any organisation and has been used extensively on specialist and consultative roles with project management and project management training. He has been involved since 1984 within the Project Management industry, having started his career in the Royal Air Force before working and delivering projects in the nuclear, public and private sector and the international sporting field. Founder of M R Project Solutions Limited, he has over the past years been engaged with various clients working on the improvement and development of the project management delivery. His involvement is in the form of bespoke learning experiences as an SME in the project management area, writing methodologies for organisations, creating and maintaining project management offices or entering companies to improve their efficiencies within their work streams and to assist with their effective delivery of projects.

Mark has been especially successful recently working with the Saudi Eastern Province Government, developing a new approach to the 20 municipal regions for their construction and infrastructure projects in Saudi Arabia. A published article author in national and international project publications, Mark has been recognised as a specialist trainer and consultant in his discipline, thanks to his professional titles, memberships and accreditations as Licence of City & Guilds in Project Management, Fellow of Association of Project Management, Certified Project Consultant, and Change Management Practitioner.

## SUSTAINABLE DEVELOPMENT & ETHICS

This Program also focuses on aspects related to sustainable development and ethics, by:

- Maintaining project integrity, ensuring corresponding specifications are followed and changes to any and all approved plans receive prior authorization.
- Reporting safety violations, diligently investigate any and all safety violations, ensuring that they meet corporate standards.
- Assuring the role as a supervisor, providing oversight of the entire project, ensure that violations are reported, in accordance with corporate policies and procedures.

## CERTIFICATION EXAMINATION

Program success is valid by full attendance as well as the passing grade of 70% or higher on the final two-hour Certification Exam, demonstrating that the delegate has successfully learned, retained, and can utilize the Program knowledge.

The final Chartered Certificate is awarded by AAPM, UBT, and CEC.
